

Parts of a Cobb Learning Edublog

Note: Use the following link to create your Cobb Learning Edublog: <http://www.cobblearning.net/>

Notice the URL (web address) of the blog below. The site's title appears in the URL. **DO NOT** enter your badge ID for any requested information when creating your Cobb Learning account so it will not appear in your blog's URL.

The screenshot shows a web browser with the address bar containing www.cobblearning.net/ccsdintechnews/. A red arrow points to the URL. Below the browser, a red box highlights the blog title "#CCSDInTech News" in the top navigation bar. Another red box highlights the navigation menu with items: HOME, INTECH WEBSITE, INTECH BLOG, INTECH PLN, and WEBINAR WEDNESDAY. A third red box highlights the main content area, which includes a "MARCH 2018" header, a scroll-down instruction, and several article teasers such as "Blended Learning", "SUMMER Professional Learning", and "Recordex Simplicity Equipment Makes Life SIMPLE!". A fourth red box highlights a sidebar widget titled "SUBSCRIBE TO INTECH NEWS BY EMAIL" with an input field and a "Subscribe" button. A fifth red box highlights an "ARCHIVES" widget with a list of months from March 2018 to August 2017. Callout boxes with arrows point to these elements: "blog title", "blog pages", "most current blog post", and "widgets set up from the Appearance section of your Dashboard."

Posts vs. Pages

Posts are entries listed in reverse chronological order (most to least current) on your blog's home page. They are constantly updated with each new post.

Pages contain static information that does not change often. An example is an About Me page or a Course Syllabus page.
