

Customize Start Menu – Windows 10

These directions explain how to customize the start menu after Microsoft Click to Run update.

Customize Start Menu

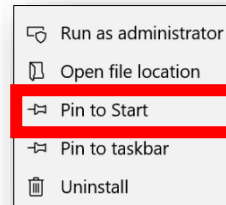

1. Click the **Windows Icon** to open the start menu.

2. Scroll to find or type in the name of a program in the search box.

3. **Right click** on the **program name**.

4. Choose **Pin to Start**.

5. The program will now be pinned to the start menu for quick access the next time you click the Windows icon.

6. The start menu can be customized by naming groups of icons and changing the size of the icons.
