

# Enable Student Login During Testing

If a student gets logged out of an assessment during a testing session with the remote, follow these steps to enable the student to log back in.

*Note: Although the Limit Users to a Single Login checkbox is not a recommended setting for iRespond, these steps will work if it has been checked.*

1. **Right click** on the **student's name** on the teacher iRespond dashboard.

2. **Select Login** from the drop-down menu. **Click Enable.**

3. The student may now log back into the remote.

*Note: To log back into the remote, the student should enter PIN (student number) and press SEND.*
