

iRespond Printing Reports

Teachers can view and print students' test results. In addition, teachers can generate reports for each individual student. The reports can be printed or saved as a PDF file for parents and students to view. Two methods for printing reports are outlined below.

Method 1:

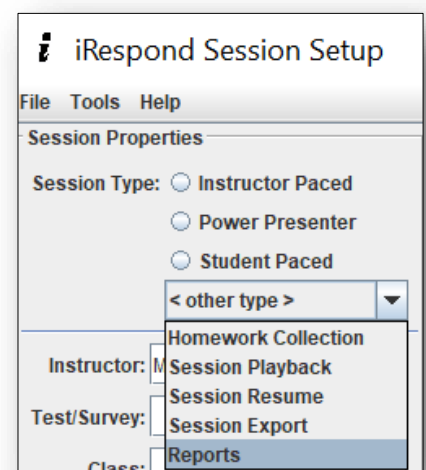

The Session Close Summary dialog is displayed when closing an iRespond session. This dialog provides useful information to the instructor regarding the status of their session, as well giving them the opportunity to quickly save the session, print test scores, or prevent session data from being automatically exported.

1. Click the **Print Test Scores** button
2. The **Print Scores** button opens the *Test Results* report for the current session, which can then be printed by the instructor.
3. A PDF file of the report will appear, and a print menu will appear.

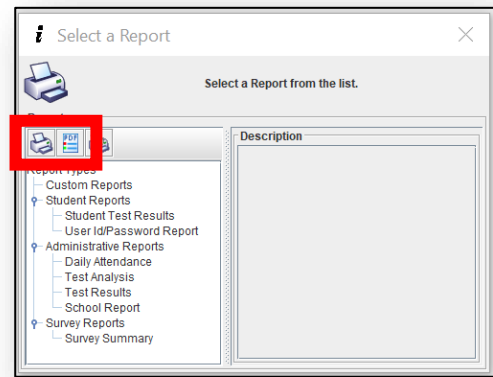

Method 2:

1. **Login** to iRespond.
2. Under **Session Type**, select **Reports** from the drop-down list.
3. Place a **checkmark beside the desired test**.
4. Click the **Start** button.

5. Chose the desired report and then click the **Printer** icon (print), the PDF version or the **Preview** icon.
6. View the report.

Suggested Reports:

Student Test Results – Depicts the detailed performance of an individual student in the session. This report includes each session question along with the selected and, if applicable, correct responses for an individual student.

Test Analysis – Depicts the performance of ALL participants over the entire testing session. This report includes each question in the session and the corresponding performance of the participants on that question.

Test Results – Depicts the final evaluation for all students in the session.
