# CCSD Wireless Directions: iOS 12.2 or Later

The following are directions for connecting your **PERSONAL** iOS device running version 12.2 or later (iPhone, iPad, iPod) to the CCSD Secured Wireless Network. You must complete **all three sections** and **follow all steps** for the Internet to work properly: Connect to Wireless, OnBoarding Verification, and Certificate Download.
Connect to Wireless

1. Go to your WiFi settings and select the **CCSDWireless** network.
2. You will need to enter the **Password** provided by your local school's Library Media Specialist, Lab Manager, School Administrator, or TTIS. Press **Join**.
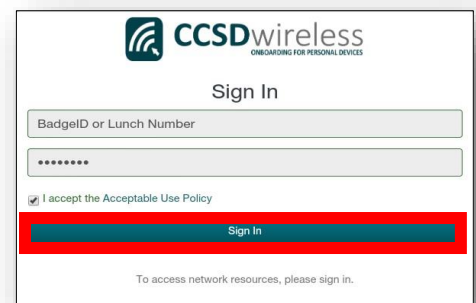

3. Open the **Safari** web browser and navigate to login.cobbk12.org.

OnBoarding Verification

4. Sign in to CCSDWireless using your **badge ID** (for staff) or **lunch number** (for students) and **Network Password**.
   Note: Network password is the same password used to access any school computer. Remember to check the Acceptable Use Policy after reading the terms.
Certificate Download

5. You will be redirected to the SSL Certificate Page. Click on the **gold key** to install the SSL Certificate.
   Note: If you do not get redirected to the SSL Page, open a web browser, and go to cert.cobbk12.org.
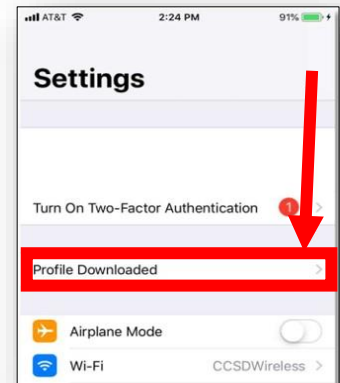

6. When the popup window opens, select **Allow**.

7. Select **Close**.

8. Return to the Home screen and select **Settings**. You will now see the Profile Downloaded option at the top. Select **Profile Downloaded**.
   *Note: If Profile Downloaded does not show, click General and scroll down on the right to Profile.*

9. Select **Install** for the **CCSD FortiGate Root Authority Profile**.
   Note: This step requires the device to have a lock screen password. Enter the lock screen password to continue.
10. Confirm by clicking **Install** a second time.
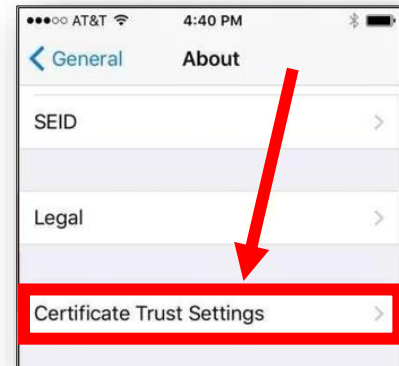

11. Click **Done**.

12. Update the Certificate Trust Settings. From your device's Home screen, select the **Settings** icon.
13. From the Settings menu, select **General**.
14. Select **About**.

15. Scroll down to **Certificate Trust Settings**.

16. Turn on the **CCSD FortiGate Root Authority**.

17. Select **Continue**.

18. Navigate to a secure HTTPS site like www.yahoo.com, www.google.com or www.bing.com. Verify that the page displays properly.
