

# Log Out of Clever on a Shared iPad

When accessing apps via Clever on a shared iPad, a student will appear to be logged out. However, when the next student accesses apps via Clever, the previous student is still logged in; therefore, each student must log out of Clever before another student uses the shared iPad. These directions explain how students can completely log out of Clever.

1. Tap in the upper right corner on the **student's name** and select **Log Out**.

2. Close the Safari browser by clicking the **Home Button** twice and swiping up to fully close the Safari browser and any other apps that were opened via Clever.

*The student is now fully logged out of Clever on the shared iPad, and another student may access apps via Clever using his or her login information.*
