

Introducing a new BYOD NETWORK

CCSD wireless
ONBOARDING FOR PERSONAL DEVICES

The NEW CCSD Wireless Network!

Wireless Network - The BYOD (bring your own device) wireless network for staff and students is CCSDWireless. Make sure that all students who bring their own devices are registered on the new CCSDWireless network.

CCSD Wireless Directions: The Instructional Technology [BYOD support webpage](#) includes directions for several types of devices to help teachers and students connect to the CCSDWireless network. Click on the image for your device and follow the directions for connecting and installing the security certificate. See your TTIS for further support.

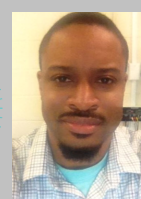

NEW BYOD Proposal Process

Since 2012, schools have completed a paper BYOD proposal document (including a principal assurance form and signed parent permission). This year, schools will complete an online BYOD school proposal. Plus, we are offering BYOD certification professional learning modules through CTLS Teach. [Learn more about becoming a BYOD school...](#)

Office 365 for ALL Students!

All CCSD students (K-12) now have access to the Office 365 digital tools suite unless a parent previously selected the opt-out decision. Parents can confirm student access and/or obtain their student's Office 365 username via **ParentVue** (<https://parentvue.cobbk12.org/>).

Teachers can run a **REPORT** to determine student Office 365 usernames. (SIS4130 report using the Report Search widget in the CCSD Portal <https://aportal.cobbk12.org/>).

Shortcuts for Windows 10

- **Sign out of Win10:** click on Windows Start icon & then click on the User icon, next select Sign Out.
- **Underline text:** Ctrl + U

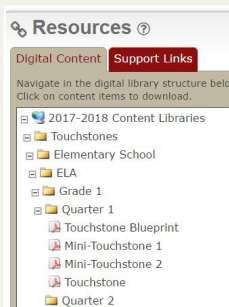

The 4 C's with Office 365

Use Office 365 to incorporate the 4C's into the classroom! Tap into students' critical thinking, collaboration, communication, and creative skills with the various Microsoft tools to help them achieve in the classroom. [Learn more...](#)

NEW Look for CTLS Assess!

On the new CTLS Assess dashboard, you can now easily switch between CTLS Teach and CTLS Assess. Use the link in the top right section of the menu to navigate between both. Visit the CTLS Assess blog to learn more about the new updates: <http://www.cobblearning.net/ctls/>

NEW Location for Touchstones!

Find the Blueprints and Touchstones within CTLS Assess in the Resources Widget. Use Edge or Chrome browsers when navigating and drilling down in the Touchstone folder. <http://ctls.cobbk12.org/>

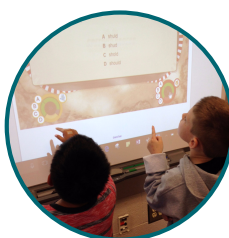

Windows 10 & SMART Learning Suite Resources

Don't forget all teacher laptops that are running Windows 10 have access to the SMART Learning Suite included in SMART Notebook 16.2. Along with the exciting new updates, the Learning Suite offers:

- The ability to create and use built-in interactive lessons, games, and quizzes that can be shared with other teachers
- Compatibility with all interactive devices (SMART, Promethean, eBeam, or Recordex SimplicityTouch)
- An easy way to gamify learning with SMART lab by utilizing school devices or personal devices via classlab.com

Let SMART Learning Suite enhance student engagement in your classroom this year! [Learn more...](#)
