

Connecting Personal Devices to the CCSD Guest Wireless Network (Kindle)

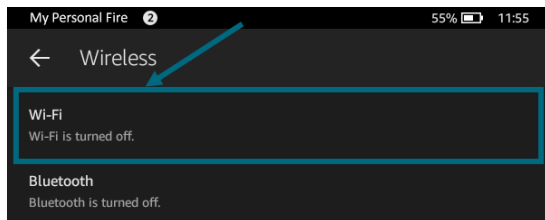

The following are directions for connecting your PERSONAL Amazon Kindle device to the CCSD Guest Wireless Network.

1. From your device's Home screen, select the **Settings** icon.

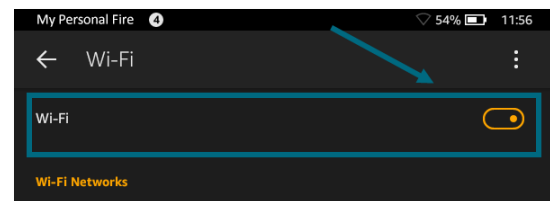

2. Once you are in the Settings menu, select **Wireless**.

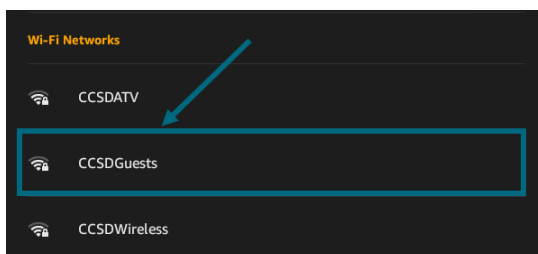

3. Select **Wi-Fi**.

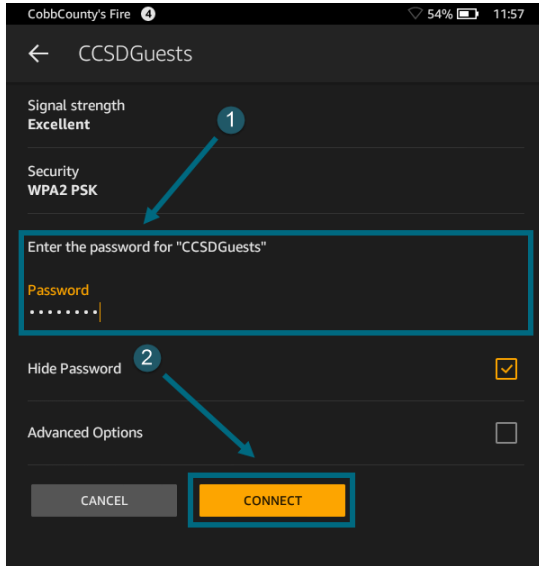

4. Ensure that Wi-Fi is turned **ON**.

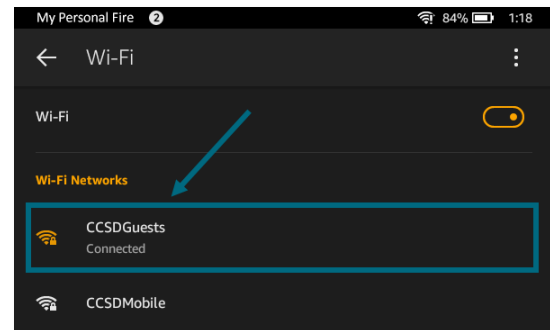

5. Select the **CCSDGuests** network.

- You will need to enter the password provided by your local school's Library Media Specialist, Lab Manager, or School Administrator to join the CCSDGuests network. Once entered, press **Connect**.

- Wait for "Connected" to appear below CCSDGuests.

- Return to the device Home screen by clicking the **Home** button (center circle).
- Open a web browser (i.e. Silk, Opera) and navigate to www.cobbk12.org.

10. If you have NOT registered for a Guest Account DURING THE CURRENT SCHOOL YEAR, select **New Guest**. If you received your Guest credentials during a previous visit, select **Returning Guest** and continue at Step 13.

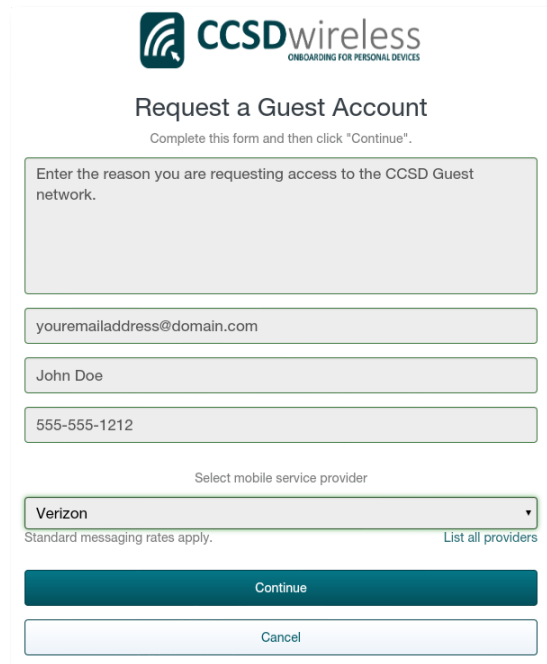

Note: Guest Accounts MUST be renewed every year beginning July 1st.

11. Complete all of the requested information consisting of:

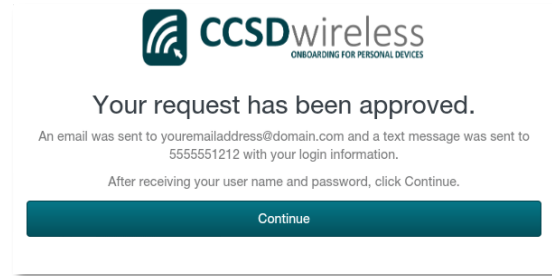

- The reason for requesting access
- Your valid email address
- Your full name
- Your mobile phone number
- Your mobile service provider

After completing the form, select **Continue**.

12. Verify that the correct email address and phone number has been submitted, then select **Continue**.

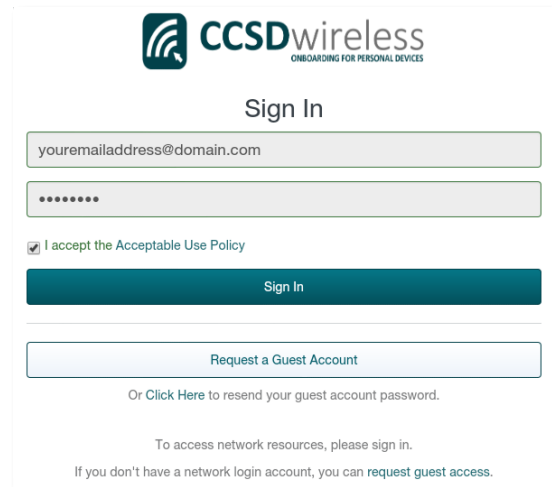

Note: You will receive an email and text message that contains your username and password.

13. Enter the email address and password that was sent to you.

Check the "Acceptable Use Policy" after reading the terms.

Select **Sign In**.

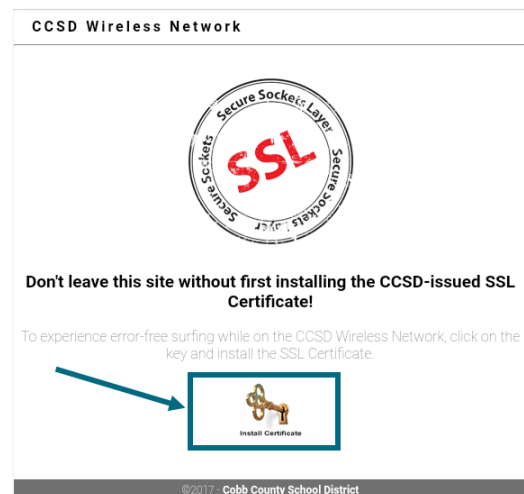

14. You will be re-directed to the *SSL Certificate Page*.

Click on the **gold key**.

Do not leave this site without first installing the CCSD-issued SSL Certificate!

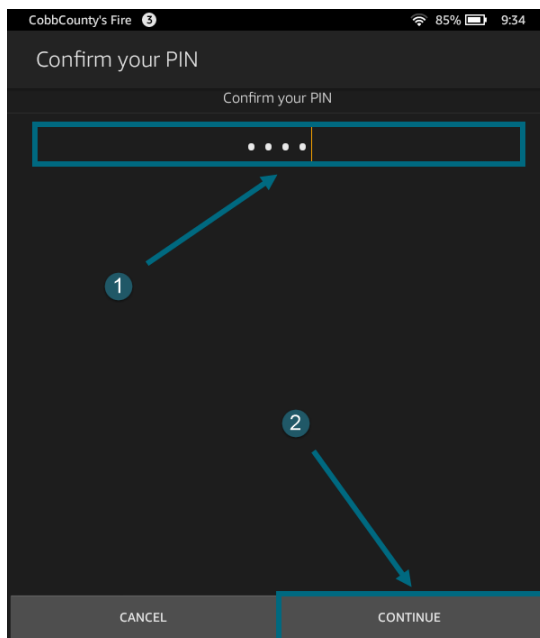

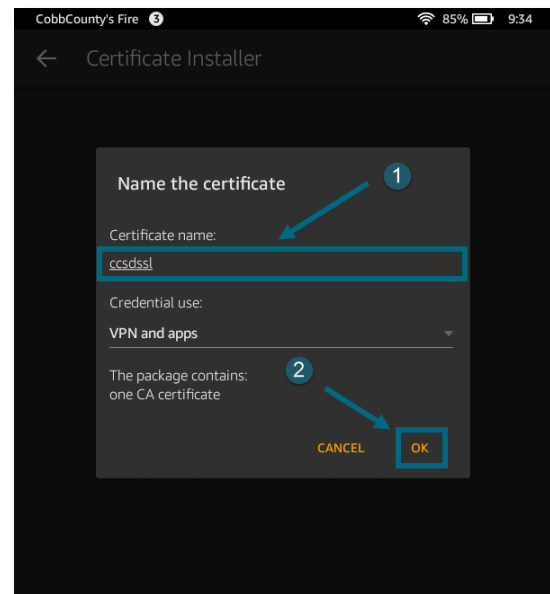

It will be required to experience error-free surfing at secured HTTPS sites while on the CCSD Wireless Network.

15. Once the certificate has completed downloading, Click **Open** to begin installing the CCSD-issued SSL Certificate.

16. When prompted for a Certificate Name, enter ccsdssl, then click **OK**.

17. Your device may require that you confirm your PIN (unlock code) before saving the SSL Certificate. If prompted, enter the PIN then click **Continue**.

18. Navigate to a secure HTTPS site like www.yahoo.com, www.google.com or www.bing.com. Verify that the page displays properly.

19. Please contact the front office if you encounter any issues connecting to the CCSDGuests network.
